For the man to whom a car is an important instrument of his profession who understands fine craftsmanship and who, in his leisure, appreciates the finer points of out-of-the-ordinary motoring, B.M.W. have built these cars of rare distinction. Enjoy the relaxed motoring that eases the tensions of town driving. Savour something new in vivid performance on the open road. The new 1800, for example, with its o.h.c. engine, full independent suspension, disc front brakes and distinctive styling is essentially a car for the man who is prepared to pay the little extra that real quality always costs.

# CICATRIN

**accelerates healing  
rates by 25-50%\***

Prolonged and expensive treatment of chronic ulcers may be avoided by the use of Cicatrin, the leading amino-acid/antibiotic preparation for topical application.

Further evidence of the efficacy of Cicatrin is provided by a recent controlled clinical trial to evaluate the influence of various topical applications on the healing rates of stasis ulcers. This trial shows that Cicatrin with its combination of selected amino-acids and antibiotics accelerates the healing rates by 25-50%.

It is also significant that in one group where the main difference between the two preparations was that one contained amino-acids and antibiotics (Cicatrin) and the other antibiotics only, the healing time in the Cicatrin treated group was shortened considerably both in bed rest and ambulatory cases.

# CONSIDER ERYTHROPED FIRST

TRADE MARK

Erythrocin® (erythromycin, Abbott) has an important part to play in summer, as in winter. Children still get bacterial throat infections, and Erythrocin can be considered first against these complaints. It is usually the antibiotic of choice, for it gives excellent activity against the cocci (and also certain of the Gram-negative pathogens), and is probably the safest of all effective antibiotics.

Erythroped (Erythrocin paediatric presentation) is a palatable cherry-flavoured form of erythromycin which is readily absorbed and free from potential toxicities, at a price which compares very favourably with other liquid antibiotic preparations.

## . . . AGAINST CHILDREN'S INFECTIONS

**ERYTHROPED Dosage:**  $\frac{1}{2}$ -1 tsp 4-6\* hourly.

\* While Erythroped should be taken at 4-hourly intervals if optimal therapeutic blood levels are to be maintained, the more convenient 6-hourly schedule may be prescribed in milder infections.

**Presentation:** 60 ml bottle (24 doses of 100 mg).

Each 5 ml teaspoonful contains 200 mg Erythrocin ethyl succinate.

Erythrocin (erythromycin, Abbott) is also available as film-coated tablets of 100 and 250 mg Erythrocin stearate (adult dosage, 1-2 Gm/day); as Erythrocin I.M. (Erythrocin ethyl succinate) for intramuscular injection; and as Erythrocin lactobionate for intravenous injection.

## The problem of the dirty mouth

Even in 1964 the dangers, and the unpleasantness, of the dirty mouth are still present in the post-operative period, as well as in many fevers; the geriatric patient being especially prone to them. Careful attention to oral hygiene will usually, of course, keep the patient comfortable and prevent complications. Such attention, however, is very time-consuming to the nurse; and it is not often realised that for most patients it can be replaced or supplemented by the use of chewing gum.

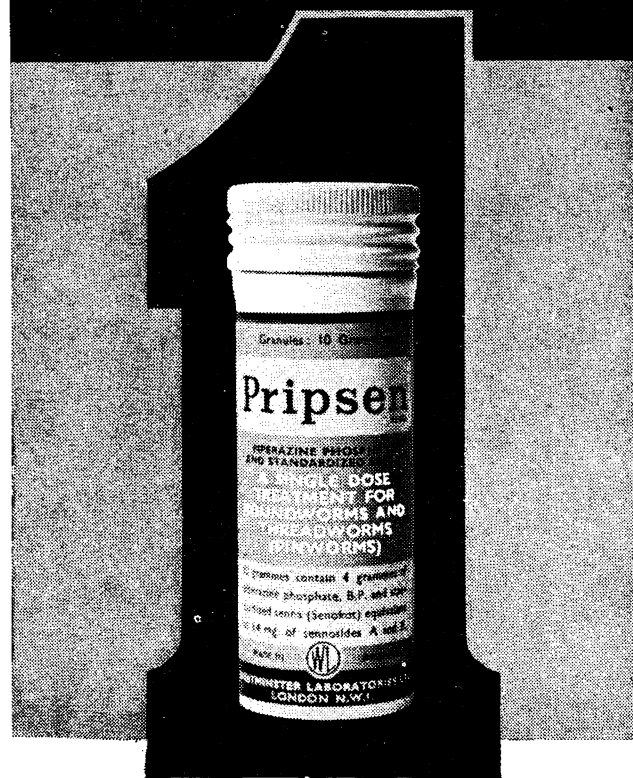

The regular use of chewing gum, by stimulating salivary flow, keeps the mouth clean in the most natural way possible. The patient is in a sense providing his own nursing care with the minimum of energy expenditure by himself.

Child patients, of course, need no encouragement to chew gum. The older patient may need encouraging—but not once he has appreciated the very obvious cleansing and refreshing effect that chewing gum has upon the mouth. Chewing gum is also of value to patients who are forbidden to smoke.

"Pripsen...is a highly effective agent against ascariasis."

"Of the 88 patients completing the trial, 74 (84%) were cured by a single dose and, in the remaining 14, repeated dosage...resulted in a 100% cure-rate...Apart from one patient...there were no undesirable side-effects in this series, which included babies of 4 and 5 months."

# The Exhibition at the B.M.A.

It is 35 years since the B.M.A. last held their Annual Meeting in Manchester and during this time there have been many changes and additions to the programme. A further change takes place this year when Scientific Proceedings will be run as an integrated programme. The broad title is "Medicine in the Sixties; The Needs Arising from a Changing Pattern of Disease."

The Pharmaceutical Exhibition, which is always arranged concurrently, will therefore be set off against this most appropriate background. Fortunately this year more room is available than previously and over fifty firms, associations and services will be represented.

The Exhibition will be opened on Monday, July 20, in

## THE VALUE OF THE SMALLEST CARDIOGRAPH IN THE WORLD

The "Cardette," weighing only 8 lb. and measuring 9 in. × 5½ in. × 3½ in., with an ambient operating temperature range of from — 10° C to + 50° C makes a diagnosis possible in any situation. Selection of all leads is by push buttons: a switch incorporating full and half gain is available. Recordings are on 4 cm. heat-sensitive paper, running at a speed of 2.5 cm. per second; base line is drift free. The instrument is fully transistorised and incorporates a built-in charger enabling power cells to be re-charged from any A.C. mains source between 100–250 volts without recourse to mains voltage selector. Special charging lead unit re-charges instrument from 12 volt vehicle battery. State of charge seen at a glance. The "Cardette" is British in design and manufacture.

# Synadrin<sup>®</sup> for the patient with angina pectoris

Regd. Trade Mark

Synadrin is chemically unrelated to any known treatment for coronary disease. Its activity has been demonstrated in animal experiments<sup>11-17</sup> and its effectiveness has been confirmed by both open and double blind trials.<sup>1-10</sup> Synadrin has been described as "an effective drug for treating angina pectoris."<sup>1</sup>

**Effective and safe:** Synadrin has been shown to reduce the frequency of anginal attacks. It is particularly successful in patients with coronary ischaemia with or without previous infarction. It produces prolonged improvement of the coronary blood supply, and consistent treatment over a period of weeks produces the best results. Synadrin is well tolerated and its safety has been shown by use in a great number of patients since its introduction.

**Dosage:** Treatment may be initiated with 2 tablets, three times daily, reducing to a maintenance dose when beneficial effects are noted.

**Presentation:** Synadrin is presented as tablets, each containing 15 mg. of prenylamine lactate in bottles of 30 and 150 at basic NHS prices of 8/8d. and 34/8d. (subject to P.T.). Synadrin is known in some other countries as Segontin.

## INTERESTING READING

It has been said of a certain famous daily newspaper that its front page is not news. This can possibly be said of many journals! It may even be said of the *B.M.J.*'s final pages.

These, of course, are devoted to a miscellany of small announcements. Many deal with appointments in practice and hospitals (at home and overseas) and educational programmes.

However, there is always a nicely balanced variety of doctors' Personal Notices, Hotels, Consulting Rooms, Commercial advertisements of all types, Cruises and Tours and sometimes an item to tickle the palate under Bon Appetit or one to appeal to the outdoor enthusiast under Sailing.

As a reader you will find these classified advertisement pages a source of real interest or, as an advertiser, something to be used to advantage.

# GRIP ALONE IS NOT ENOUGH!

## NEW Firestone F7

### gives you the strength behind the grip!

Grip is important but grip alone is not enough: it's the strength behind the grip that counts. The world's finest grip is of little use if the carcass won't stand up to the strain or if the tread wears out too quickly. There's more to a tyre than grip alone: you need grip plus strength.

Firestone development engineers have spent years of research and testing to produce the F7, the perfect tyre, round shouldered, strong, cooler running, flexible: a new standard in safety; a tyre by which to judge all others. Perhaps some day all tyres will be as good—today the F7 is paramount.

#### STRONGER TYRE BODY

F7 cord body is built to stand up to the toughest of everyday motor-ing conditions.

#### GREATER STABILITY

F7 tread profile gives a smooth, true ride, even over cats' eyes and raised white lines.

#### BETTER CORNERING

F7 grip acts superbly when needed most—on corners. Safer cornering than ever before.

#### HIGHER MILEAGE

F7 tread has special stabilisers built-in to give more miles.

#### ADVANCED TREAD PATTERN

F7 tread has seven ribs—five main ribs, plus two round the shoulders to give non-skid safety.

#### REMARKABLE WET WEATHER GRIP

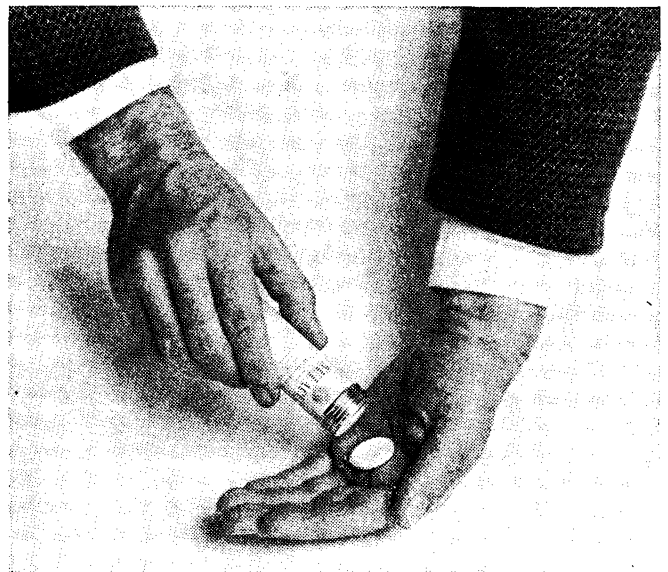

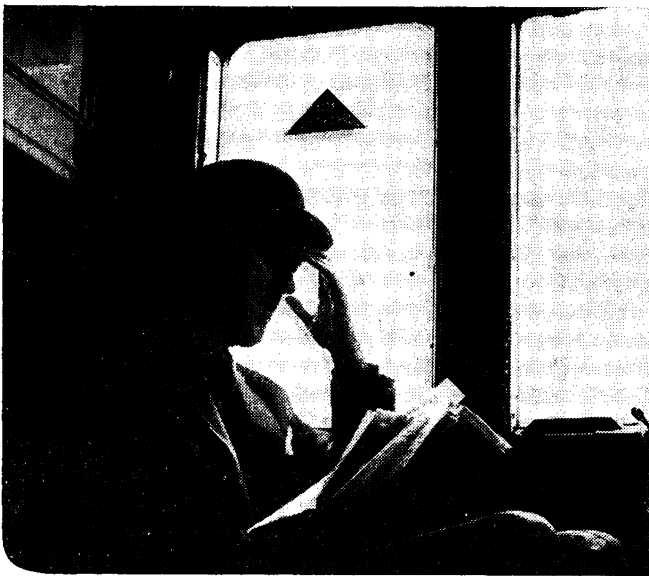

F7 tread pattern is scientifically designed to squeeze water away from the point of road contact.

#### NEW RUBBER COMPOUND

F7 is made with the latest Firestone miracle rubber compound SUP-R-TUF for safety and long life.

# NULACIN...

## FOR THE TREATMENT OF PEPTIC ULCER

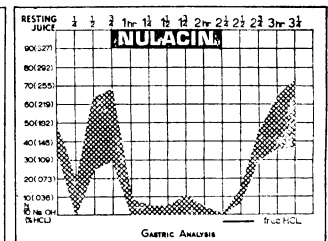

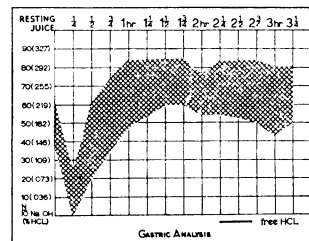

### Nulacin provides intragastric milk-alkali drip therapy without a tube

Nulacin is the most convenient way of treating peptic ulcer because it provides continuous neutralization of gastric hyperacidity for the ambulant patient. The Nulacin tablet is merely placed between cheek and gum and allowed to dissolve. Nulacin offers an effective treatment for peptic ulcer to both the bed-ridden and the ambulant patient.

Nulacin tablets are prepared from whole milk combined with dextrans and maltose, together with magnesium trisilicate 3.5 grs.; magnesium oxide 2.0 grs.; calcium carbonate 2.0 grs.; magnesium carbonate 0.5 grs.; Ol. Menth. Pip. q.s.

**DRINK**

# Betnesol

the soluble steroid

Betnesol is a tablet of *soluble* betamethasone phosphate. It dissolves spontaneously in water to form a palatable, tinted, particle-free solution for oral administration.

### Greater consistency of therapeutic effect

By reducing particle size of corticosteroids, efficiency of their absorption is increased. The ultimate attainable is a true solution, the form in which Betnesol is taken. This ensures maximum absorption, the most consistent therapeutic effect, and allows reduction of dosage in certain cases.

### Less dyspepsia

Because no solid steroid reaches the stomach, the incidence of gastric disturbance is even less with Betnesol than it already is with betamethasone alcohol (Betnelan).

Betnesol Tablets give further good reasons for making betamethasone your *standard* corticosteroid for treating such conditions as asthma, allergies and dermatoses. This compound has enhanced anti-inflammatory activity, and negligible effect on sodium and potassium balance. It offers renewed benefit to patients on long-term steroid treatment.

## continuous drip control of ulcer by tablet

---

PRODEXIN tablets give all the benefits of continuous intragastric drip therapy<sup>1</sup> without any of its disadvantages.

The slow suck down tablets are specially formulated to give prolonged antacid buffer effect, unaffected by stomach emptying rate.<sup>2</sup>

Immediate relief of pain is achieved by rapidly raising pH to 2 neutralising excess acid and controlling the acid secretion by slowly building up the pH to a desirable level of pH3.5 and pH4.5

### DOSAGE:

For continuous therapeutic effect one tablet at a time should be sucked slowly.  
For peptic ulcer one or more tablets an hour.

“Doctor,  
I feel awful”

Once she might have been diagnosed as “anxiety state”. Today, you know she might be a depressive, but it doesn’t seem as simple as all that. The truth of the matter is that patients don’t always fit neatly into diagnostic categories. They may suffer from such diverse symptoms as depression, agitation, loss of appetite and tension-fatigue at the same time.

The great strength of ‘Aventyl’ is that its beneficial actions range widely over the symptoms which plague these

problem patients. ‘Aventyl’ is not merely an anti-depressant, nor is it a combination of drugs. It is a *single substance* which relieves a constellation of mental and emotional symptoms embracing depression, anxiety and their effects on awareness and mood.

*‘Aventyl’ is not a monoamine oxidase inhibitor, and no serious side-effects have been reported at the recommended dosage.*

## Clinical tests confirm Alphosyl's effectiveness

Accumulating evidence increasingly underlines Alphosyl's effectiveness in cases of psoriasis, even in those that have proved intractable to other forms of treatment. Its success is attested by the fact that after only 2 years Alphosyl Lotion became the leading branded preparation for psoriasis in this country.

**New Alphosyl Cream** Following the success of Alphosyl Lotion, this coal-tar and allantoin combination is now available in Britain as a lubricating cream. The cream base has proved a particularly effective vehicle for Alphosyl as it incorporates a combination of free fatty acids (saturated and unsaturated) naturally occurring in triglycerides, sterols and esters to give the lipid phase of the base a significant resemblance to the lipid array of normal human skin<sup>1</sup>.

**Clinical Trials** The table below gives the results of four different clinical trials which show the effectiveness of Alphosyl in lotion and in cream form.

No. of patients	100% cleared	75%–99% improved	50%–74% improved	25%–49% improved	No improvement
62 <sup>3</sup>	29	26	7	0	0
50 <sup>4</sup>	11	16	17	6	0
41 <sup>1</sup>	27	9	5	0	0
96 <sup>2</sup>	44	29	15	0	8

**Why Alphosyl is so effective** In Alphosyl, allantoin and a specially refined coal-tar extract were combined for the first time. Allantoin has been found to be particularly effective in loosening psoriatic scales<sup>5</sup>, while the keratoplastic effect of coal-tar is well known<sup>5</sup>. Alphosyl is non-greasy and non-staining and vanishes on application. It is notably safe,<sup>5-4</sup> being free from the risks which are found in other forms of treatment such as arsenicals, mercury, corticosteroids, x-ray, etc. It certainly deserves a trial in all cases of psoriasis.

Stafford-Miller Limited, Hatfield, Herts. by arrangement with Reed & Carnrick, Kenilworth, New Jersey, USA.

**Alphosyl Lotion** formula—special coal-tar extract 5% + allantoin 2% in a smooth, non-greasy lotion base.

**Alphosyl Cream** formula—allantoin 2% + 90% alcoholic extract of coal-tar (5=1) 5% in a vanishing cream type base.
